Experience

Onefinnet   **July 2024 – Present**
Frontend Developer Intern   *NOIDA, India*
- **Engineered responsive, reusable, and scalable components** and pages, managing entire workflows and maintaining clean code practices using **NextJS, ReactJS, TypeScript, Redux-toolkit, MaterialUI**, and **SCSS** for multiple portals, including public landing pages, private job boards, and authentication pages.
- **Optimized complex filtering and search functionalities** for public and private job boards, reducing resume search and screening time by over **100 hours per role** and enhancing performance.
- **Developed AI-driven features** like resume screening and scoring functionalities with automated workflows, global status handling, and loading state management, tested on over **150 resumes** to improve recruitment efficiency.
- **Collaborated with cross-functional teams** to identify and resolve UI/UX issues, optimize code, and deliver frontend enhancements, ensuring high-quality deliverables and meeting project deadlines.

OKURA (Runon Private Limited)   **Mar 2024 – Apr 2024**
Frontend Developer Intern   *New Delhi, India*
- **Designed and implemented responsive, reusable UI components** from scratch for a no-code **SaaS** website builder, creating over **40 layouts** with **Next.js**, **TypeScript**, and **TailwindCSS**.
- **Crafted core drag-and-drop functionality** for elements like text, images, videos, and graphs with customizable styles, enhancing user flexibility.
- Integrated third-party libraries such as **react-dnd**, **d3.js**, and **react-color** to extend platform capabilities.
- Added engaging animations using **framer-motion**, including **parallax** and variable-speed background effects, improving **user experience**.

Projects

Hotelify ↗ | [**Live**] | MERN stack, Vite, Stripe, TailwindCSS, Cloudinary, JWT, bcryptjs, playwright   **May 2024**
- Engineered a full-featured hotel booking site inspired by **Booking.com**, offering seamless hotel search, booking features.
- Established secure authentication using **bcryptjs** and **jsonwebtoken**, ensuring smooth user registration and login.
- Built a **dynamic search** and **filtering** system enabling users to find hotels by location, dates and preferences with ease.
- Streamlined image handling for hotel listings by integrating **Cloudinary**, improving efficiency for hotel owners.
- Enhanced reliability with **end-to-end testing** using **Playwright** to ensure robust functionality across workflows.

ImageAI | **Dall-E Clone** ↗ | [**Live**] | MERN stack, TailwindCSS and OpenAI's Dall-E API   **Aug 2023**
- Architected a **Dall-E** clone for **AI-powered** image generation, providing users with a seamless interface for **creating images** from **text prompts**.
- Developed a **Community Showcase**, enabling users to share and explore AI-generated images, fostering collaboration.
- Utilized OpenAI's **Dall-E API** for personalized image creation, featuring a 'Surprise me' option for spontaneous results.

Recruitify ↗ | [**Live**] | ReactJS, TailinwdCSS   **July 2023**
- Designed a **responsive** recruitment landing page showcasing frontend development skills and demonstrating expertise in building **reusable**, **scalable**, and **modular React** components.
- Applied modern **UI/UX principles** using **TailwindCSS** for rapid development and consistent styling.

Certifications / Awards   **December 2021 – Present**

- **DevTown** — DSA (C++)
- **Holopin Badges** — Hacktoberfest (2022, 2023, 2024)
- **Dev.to** — Hacktoberfest
- **IDEMI** — Govt. Certificate course in Artificial Intelligence and Data Science
