Languages: Cpp, HTML/CSS, JavaScript, TypeScript, Python, SQL, C
Developer Tools: VS Code, Git, GitHub, Thunder Client, Postman, Google Colab, Figma
Technologies/Frameworks: ReactJS, NextJS, TailwindCSS, NodeJS, ExpressJS, MongoDB, Linux, MySQL

Experience

OKURA (Runon Private Limited)	**Mar 2024 – Apr 2024**
Frontend Developer Intern	*New Delhi, India*

- Developed responsive and reusable UI components from scratch using **NextJS, TypeScript**, and **TailwindCSS** for a no-code website builder, SAAS platform.
- Built core drag-and-drop features for various elements like text, image, video, shapes, tables, graphs, and countdowns with customizable styles.
- Integrated third-party libraries including react-dnd, d3.js, and react-color for enhanced functionality.
- Implemented framer-motion for engaging animations like parallax, variable speed background effects etc.

Projects

Hotelify ⎘ | **[Live]** | MERN stack, Vite, Stripe, TailwindCSS, Cloudinary, JWT, bcryptjs, playwright   **May 2024**
- Hotelify is a full-stack web app similar to Booking.com, enabling users to search for and book hotels seamlessly.
- Secure user authentication with bcryptjs and jsonwebtoken for seamless sign-up and sign-in.
- Powerful search and filter system enabling users to effortlessly find hotels based on location, dates, and preferences.
- Streamlined hotel listing process for owners, integrating Cloudinary for image handling.

ImageAI | Dall-E Clone ⎘ | **[Live]** | MERN stack, TailwindCSS and OpenAI's Dall-E API   **July 2023**
- ImageAI is a user-friendly Dall-E clone website with MERN stack and TailwindCSS for easy image generation from text prompts.
- Developed a Community Showcase for users to display their AI-generated images, fostering collaboration.
- Utilized OpenAI's Dall-E API for personalized image creation, featuring a "Surprise me" option for spontaneous results.
- Enabled seamless sharing of artworks within the community, promoting engagement and interaction.

iNotebook ⎘ | MERN stack, JWT, bcryptjs, Bootstrap   **June 2023**
- iNotebook: Your digital notebook on the web, crafted with the MERN stack and Bootstrap.
- Incorporates Bycrypt.js and JWT Authentication for enhanced security measures.
- Features an intuitive login/signup interface for seamless access to note-taking functionalities.
- Ensures user privacy with a logout option, safeguarding personal notes from unauthorized access.

Recruitify ⎘ | **[Live]** | ReactJS, TailinwdCSS   **Aug 2023**
- Recruitify is a recruitment startup page (currently just Home Page) created using ReactJS and TailwindCSS, showcasing my responsive, component based, reusable and scalable frontend design and development skills.

Certifications / Awards

**DevTown	Holopin	Dev.to	IDEMI**	**December 2021 – Present**
